

Peter Kincade - Principal Software Engineer

Today, brian, Quantumtek's local Linux host (OS built by BIZUX), returned my FASTEST linked/compilation ever. My 5 year old Dell OptiPlex SX280 client WS (they don't make them like this any more)/windows XP client with 1 GB of slow mainStore on the same lanSegment as my BIZUX built hostServer (with libraries on 15kSAS/R0; linked, compiled & wrote without error, the most efficient compiled source to executable lines ever, in my entire 50 years of existence in the known cosmos. Thank you Chris & Paul from BIZUX, u r the best of the best!"

Thank you BIZUX! You truly understand information technology for business."
